

ICE AND WATER SHIELD

I, _____, have been informed what the local building code regarding Ice and Water Shield along the Eaves of my roof is. I am aware that my insurance company refuses to acknowledge that Ice and Water shield is code OR I do not have the proper coverage to pay for it. I understand that its not fair for my contractor to pay the cost of material that the insurance refuses to pay for and will not hold them responsible for any issues that occur if I choose not to fight the carrier or pay out of pocket. I choose one of the following options:

_____ 1) I choose NOT to have Ice and Water Shield installed on my home and understand that it could adversely affect my manufacture warranty.

_____ 2) I will pay out of pocket the cost of Ice and Water Shield at the current market rate per sq ft if Insurance refuses to pay for it and take it up with them on my own.
